Summary: PSI INTERNATIONAL, Inc. (PSI) Receives ‘Notice to Proceed’ on its newly Awarded GSA Alliant Small Business Contract.

FAIRFAX, VA, February 3, 2009 – PSI INTERNATIONAL, Inc. (PSI) announced today that it has received a ‘Notice to Proceed’ from the General Services Administration (GSA) on its Alliant Small Business (Alliant SB) contract. This Indefinite Delivery/Indefinite Quantity (ID/IQ) Government Wide Acquisition Contract (GWAC) immediately provides federal agencies with a flexible and easy to use vehicle to acquire solutions and services for their comprehensive Information Technology (IT) needs.

Alliant SB offers a comprehensive array of IT solutions, including hardware, software, communications and integration services. It accommodates federal guidelines regarding enterprise architecture and other standards and protocols. It is expected that in addition to becoming a premier GWAC, this contract will replace GSA’s current Millennia and ANSWER contracts. As a leading technology company with an established track record of performance with GSA, PSI is well positioned to support the Alliant SB contract immediately and throughout the anticipated 10-year performance period.

“This award places PSI in the enviable position of being among a select group of contractors eligible to compete for government-wide contracts for the next ten years. We are extremely gratified that GSA has placed its trust in PSI’s ability to support Federal IT initiatives and the Federal Enterprise Architecture,” stated Charles Farris, PSI’s Business Development Manager for Alliant.

PSI INTERNATIONAL, Inc. Background Information

PSI INTERNATIONAL, Inc. is a Fairfax, Virginia-based company that has provided innovative Information Technology (IT) services solutions since 1977, with emphasis on integrating IT services with domain expertise. PSI serves federal, state, local, and commercial clients in the United States and in a number of foreign countries.

Today, as an independently-assessed CMMI Level 3 Company, PSI supports federal, state and local agencies in business analysis, systems design and development, implementation planning, network management, modernization programs, end-user support, and configuration management.
