SUMMARY: PSI INTERNATIONAL INC. SIGNS MULTI-YEAR MULTI-MILLION DOLLAR CONTRACT WITH THE DEPARTMENT OF VETERANS AFFAIRS

FAIRFAX VA---(September 26, 2005) - PSI International, Inc. (PSI) announced that it has signed a multi-year multi-million dollar contract with the Department of Veterans Affairs (VA) to provide life cycle development and maintenance support for the VA Military Personnel and Payroll Information Repository (VAMPPIR) project. VAMPPIR is a high visibility project to synchronize data between DOD and VA so the veterans leaving the DOD can register with the VA for their benefits. Under this contract, PSI will coordinate activities with DOD to receive the eligibility data and load into VA's database instance. As part of this contract, PSI will also enhance and re-engineer the current Veterans Information System (VIS) as a web-based application to provide access to this eligibility data.

“This contract expands PSI’s presence within VA beyond Veterans Benefit Administration and Veterans Health Administration. We are gratified by VA’s confidence in our ability to support a critical system of such high visibility. We are confident that once VAMPPIR is fully operational, it will have a significant positive impact on our nation’s veterans,” stated Richard Van Allan, PSI’s VA Program Director.

According to Bill York, PSI’s Director of Business Development, “The award of VAMPPIR contract is an evidence of PSI’s commitment to VA and its long 18-year performance history within that agency. The project will go a long way in synchronizing the records between DOD and VA. We are thrilled that PSI’s information technology and institutional knowledge at VA will improve services to the American veterans.”
